York Bank-statement:

The weekly statement of Bank averages shows an unexpectedly large increase in Loans over a million and three-quarters. A pertion of this has indonistedly been made to takers of the new Gove monation, but we find on inquiry that a large amount of Discounts was more during the week to Southern and Western banks. They require aid in the movement of the crops and in may cases are preparing their annual rejerte, and borrow strongs for that purpose. The specie line shows considerable decrease, and portion of the aid to interior banks having been seet off in Specie. The Banks, however, held at out \$1.00 to 00 more than they show, with but little prospect. I leading it som.
